

Digital Signature

Information

You need to register your Digital Signature Certificate (DSC) before using the same in system. DSC should be of Class II or III only issued by CCA approved certifying agencies in India. Please refer <http://www.cca.gov.in> for the list of licensed DSC providers. User must have a valid DSC, that is, the validity period of DSC should not be expired.

To use digital signature, you need to have the following pre-requisites:

1. **Install drivers from USB Token** - Install the drivers available in your digital signature token drive so that your machine can read the token.
2. **Install Digital Signature Utility** - Download and install the eMudra utility embridge.emudhra.com on your local machine.

PAN Number in DSC doesn't match with any of the Member/Director/Partner of the IEC. Please proceed with the Organisation Based token or IEC Based token. For further details refer to the Section Learn -> Application Help and FAQ's.
